

FLY-BOX

DESCRIPTION

FLYBOARD/HOVERBOARD transport and storage box.

Secures with an s/s bracket on watercraft ski tow hook and with a lashing strap (not included) at the rear watercraft/trailer towing hooks.

A roller mechanism allowed the storage of the hose and u pipe inside the box. FLYBOARD-HOVERBOARD secured on the top cover with a lashing strap (not included).

STXF: KAWSTX01

MAINTENANCE

To ensure adequate security before every use, we recommend to:

Check all the bolts and connections

Check the water craft lashing straps condition

Check the 8mm eye bolts (part 09)

Check FLYBOARD-HOVERBOARD lashing strap

DRIVING THE PWC

Because of the added weight of the FLY-BOX and equipment on the rear platform, the watercraft behaves differently and requires greater skills. **Special attention** needed during driving, boarding and unboarding the watercraft especially with a passenger.
